PROFESSIONAL SUMMARY

Software Engineer and Tech Lead with over 5 years of experience designing, modernizing, and scaling enterprise applications. Strong experience with PHP (Laravel), REST APIs, PostgreSQL, Docker, and Cloud/Edge infrastructure (Cloudflare, Nginx, VPS). I provide technical supervision for 4 developers while delivering backend features and architectural improvements hands-on. Proven track record in performance engineering, reducing critical execution times by more than 70%. Experience delivering cross-platform products across web, mobile (Flutter), desktop (Electron), and analytics pipelines (n8n, Metabase).

TECHNICAL SKILLS

Languages: PHP, JavaScript, Go (Golang), Dart (Working knowledge: Python, TypeScript, Java)

Frameworks and Tools: Laravel, Flutter, Next.js, Electron, Spring Boot, n8n, Metabase

DevOps, Cloud and Edge: Cloudflare (DNS, SSL, Edge), Docker, Nginx, Linux, Apache, Git, CI/CD (GitLab/GitHub), VPS Management

Databases: PostgreSQL, MySQL, MongoDB, SQLite (SQL and NoSQL)

Architecture and Engineering: OOP, MVC, SOLID, Clean Code, Design Patterns, DDD, REST APIs, Automated Testing, Prompt Engineering and AI integration

Methodologies and Leadership: Technical Mentoring, Code Review, Scrum, Agile Development, Sprints, Kanban, Production Support

PROFESSIONAL EXPERIENCE

Tech Lead / Programmer Analyst III — Libre Soluções

Aug 2021 – Present • Brazil

- Designed and maintained core modules of e-Cidade, an enterprise public-sector management system supporting daily administrative operations in 6 Brazilian municipalities.
- Refactored a critical PHP and PostgreSQL processing routine, reducing execution time from 10 minutes to 1 minute and 30 seconds (more than 70% efficiency improvement).
- Improved performance by 20% to 50% across multiple legacy system workflows through advanced SQL query optimization and backend refactoring.
- Provided technical supervision for a team of 4 developers working on financial systems while remaining hands-on with PHP development and databases.
- Led technical mentoring for approximately 15 developers, supporting onboarding and promoting Clean Code practices, SOLID principles, and architectural patterns.
- Ensured code quality and architectural consistency by conducting technical reviews on more than 10 pull requests per week.
- Delivered complex development initiatives averaging 80 Function Points, aligning business rules with robust software design.

- Handled the integration of 3 major external systems, establishing secure web interfaces such as municipal transparency portals, the SIM portal, and federal systems (EFD-Reinf and eSocial).
- Modernized legacy architectural components to improve security, data integrity, and system stability under high volumes of concurrent access.
- Translated complex accounting, financial, and regulatory public-sector requirements into sustainable software solutions using PHP, Laravel, JavaScript, and PostgreSQL.

PERSONAL AND INDEPENDENT PROJECTS

Cross-Platform Web and Mobile Ecosystem (Expected Launch: Sep 2026)

Technologies: Go (Golang), REST API, Flutter, Next.js, VPS, Cloudflare, Docker, PostgreSQL

- Architected a full-stack platform consisting of a Go REST API backend hosted on a self-managed VPS behind Cloudflare, integrated with a Flutter mobile app and a Next.js web dashboard.

Cross-Platform Desktop Application - Bucket Command

Technologies: Electron, JavaScript, Node.js

- Developed a cross-platform desktop application in Electron (Linux/Windows) for locally managing code snippets and notes to support day-to-day work, in preparation for open-source publication on GitHub.

Analytics and Demand Tracking Pipeline via GitLab

Technologies: n8n, Metabase, PostgreSQL, GitLab API, Webhooks

- Built an automated data-capture pipeline using n8n to receive GitLab API webhooks and store them in PostgreSQL, with Metabase consuming the data to generate the metrics and dashboards needed for day-to-day work.

EDUCATION

MBA in Software Architecture — Full Cycle (Feb 2026 - In progress)

Bachelor's Degree in Software Engineering — Estácio (Completed Jul 2026)

Associate Degree in Systems Analysis and Development — Estácio (Completed Jul 2024)
